The 1967 Census of Business reports will comprise eight volumes:

Vols. I, II, III, IV—Retail Trade

Vols. V, VI—Wholesale Trade

Vols. VII, VIII—Selected Services

Selected Services reports are issued first as separate preprints and then brought together in the following volumes:

#### **VOL. VII. SELECTED SERVICES, SUBJECT REPORTS**

A U.S. Summary chapter and chapters providing special data on many service industries, including laundry and dry cleaning plants, hotels and motels, motion pictures, travel agencies, law firms, and architectural and engineering firms. This volume consists of the subject reports previously issued as series BC67-SS.

#### **VOL. VIII. SELECTED SERVICES, AREA STATISTICS**

A U.S. summary chapter and chapters for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics are presented by kind of business, for counties, cities, standard metropolitan statistical areas, and for selected towns and townships in New England, New Jersey, and Pennsylvania. The kind-of-business detail varies in accordance with the number of service establishments in an area. This volume consists of the area reports previously issued as series BC67-SA.

**ACKNOWLEDGMENTS**—This report was prepared in the Business Division (Harvey Kailin, Chief) under the general direction of Louis Greenberg, Assistant Chief, Program Development. Plans for the service trade segment of the Census of Business were developed by Sol Helfand. This report was compiled under the direct supervision of John Wikoff. John Dodds and Beverly Battle contributed in resolving problems and in reviewing the data for publication. Robert Viehman served as coordinator and was the Business Division's liaison officer with other divisions. Staff assistance was provided by Paul Shapiro, Assistant Division Chief, Program Implementation; Ralph S. Woodruff, Assistant Division Chief, Research and Methodology, and Max Shor, Assistant Division Chief, Staff and Special Projects.

Systems and procedures were developed in the Systems Division (Sol Dolleck, Chief) by Eugene Wendt, Assistant Division Chief for Periodic Censuses, assisted by Samuel Schweid, Economic Census Program Manager. Clerical procedures were developed and supervised by Alvin Barten and Carl Mueller. Mr. Barten also developed the electronic computer editing and tabulation program under the direction of William Lorenz, Chief, Business Statistics Branch.

Editorial supervision was provided by Julia Moring of the Administrative and Publications Services Division.

Arthur Horowitz, in his capacity as the coordinator of the economic censuses, made important contributions to the planning and operational phases of the work.

Special acknowledgment is due to the many businesses whose cooperation has contributed to the publication of the data.

# INTRODUCTION

**AUTHORITY AND SCOPE**—The economic censuses are required by law under Title 13, U.S. Code, sections 131, 191, and 224. The 1967 Census of Business portion of the economic censuses consists of firms engaged in retail trade, wholesale trade, and selected services (hotels and motels; personal, business, and repair services; and amusement and recreation services including the motion picture industry) which operated in the United States. In addition, the Census of Business covered public warehouses, dental laboratories, law firms, architectural and engineering firms, travel agencies, and truck and bus carriers not subject to economic regulation by the Interstate Commerce Commission. Data for the contract construction industry also were collected in this census but published in a separate series of reports. The 1967 Census of Business also covered Guam and the Virgin Islands. A separate 1967 Census of Business, Manufacturers, and Construction for Puerto Rico was conducted jointly with the Commonwealth Government.

**KIND OF SERVICES COVERED**—This report presents data for the Hotel, Motor Hotel, and Motel industries. These industries comprise Group 701 as defined in the Standard Industrial Classification (SIC) Manual.<sup>1</sup> The data in this report supplement those in the area report series BC67–SA. For definitions, see appendix A.

Most of the tabulations included in the report are based on special inquiries directed to establishments with payrolls (“employers”) primarily engaged in furnishing hotel, motor hotel, and motel accommodations and other related services. Similar information is not available for establishments without payrolls (“nonemployers”) because the data for nonemployer establishments were derived from the administrative

records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA) (see “Method of Coverage” in appendix A) which did not contain the special inquiries included on census forms. Establishments with payrolls represented 68 percent of the number in this group and accounted for 97 percent of their volume of receipts.

**CENSUS DISCLOSURE RULES**—In accordance with Federal law governing census reports, any data which would disclose the operations of an individual establishment or business organization are not published. However, the number of establishments in a kind of business is not considered a disclosure, so that this item may appear in instances where other items of information for the same kind of business or locality are withheld.

**CORRECTIONS TO DATA**—Some of the data in this report comprise the statistical portions of previously published reports. Errors found after those reports were issued have not been carried to this report unless they significantly affect the data. As a result, the detail in some tables may not add to totals.

**SPECIAL TABULATIONS**—Special tabulations of data collected in the 1967 Census of Business may be obtained on computer tape, on punch cards, or in tabular form. The data provided in such special tabulations will be in summary form and will be subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications.

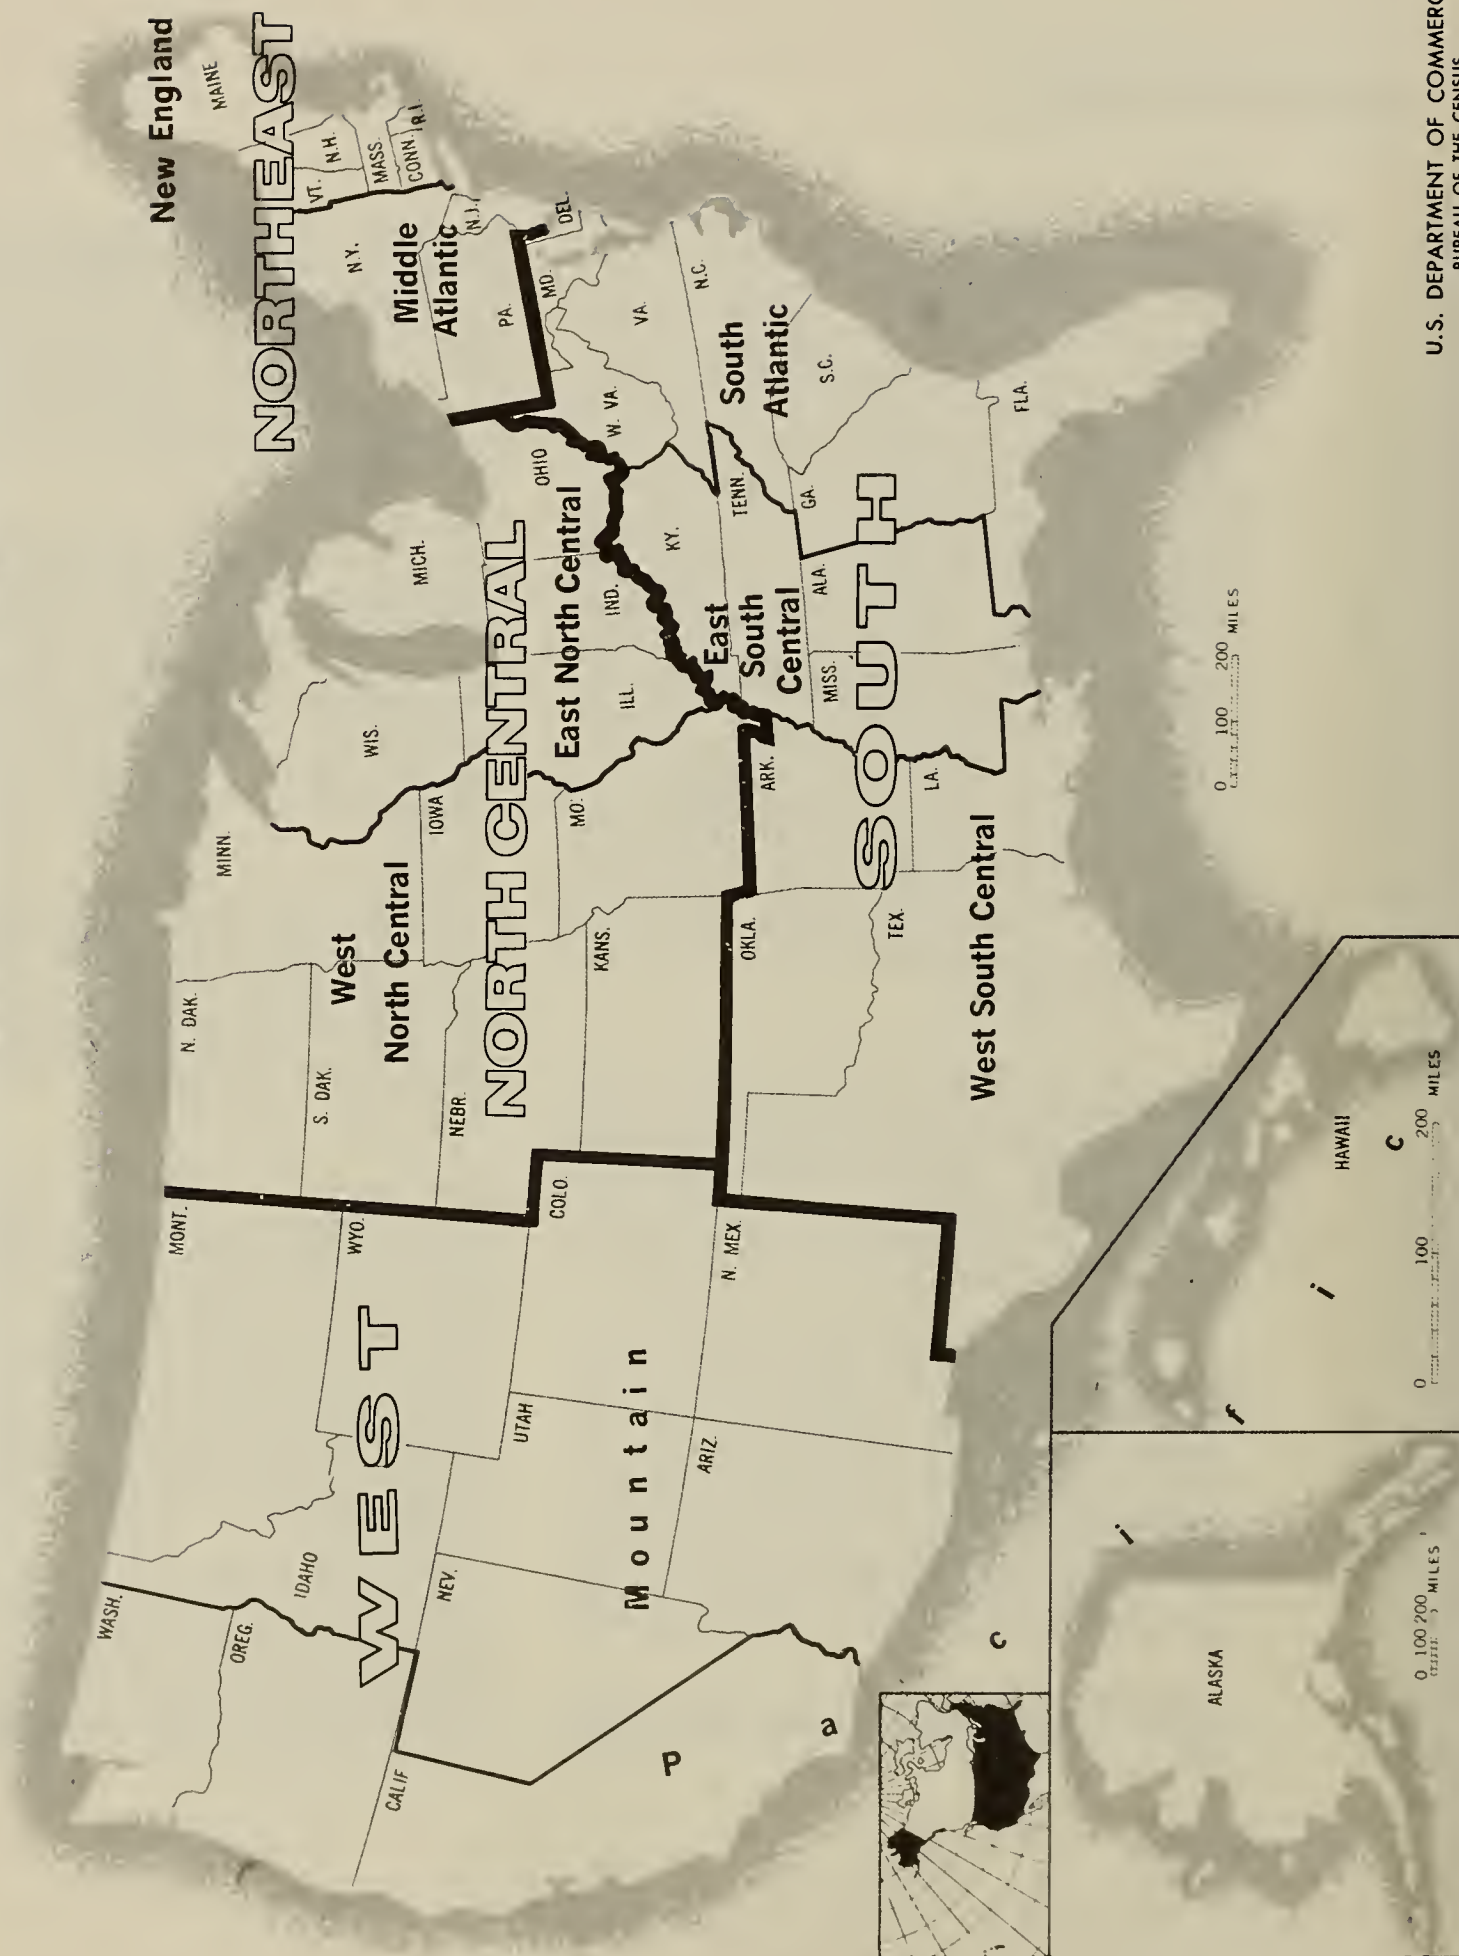

Special tabulations are prepared on a cost basis and the request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to: Chief, Business Division, Bureau of the Census, Washington, D.C. 20233.

## GENERAL EXPLANATION

### CENSUS COVERAGE

**Method of Coverage**—Effective with the 1967 Census of Business, a major shift in the method of compiling data was introduced. In the 1954, 1958, and 1963 censuses data for all “employer” establishments (those which had some paid employment during the census year) were obtained through a mail canvass. Information for “nonemployers” was obtained from Federal income tax records.

In the 1967 Census of Business, service firms were divided into two categories—the “mail” universe and the “nonmail” universe. The coverage of each component and the method of obtaining census information for these two groups are described below.

1. **The “nonmail” universe**—This group consists of firms which were not required to file a regular census return and includes the following categories:

a. **All “nonemployers”**—Consists of all firms with no paid employment during 1967. Receipts information for these firms was obtained from 1967 Federal income tax records. Although made up of a large number of firms, this segment, for kinds of business covered in this report, accounted for only 3 percent of total receipts. (Also see “Comparison of the 1963 Census With the 1967 Census,” item 3 on next page.)

In the 1967 census, data for all nonemployer establishments were compiled from tax records. In the 1963 census, data were compiled from only one-half of the nonemployer tax returns and were multiplied by 2 to establish census totals.

The census included only those service nonemployer firms which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. This treatment is the same as in the 1963 census.

b. **Selected “small employers”**—“Employers” consist of all business firms in the active records of the Internal Revenue Service (IRS) which were subject to payment of

Federal Insurance Contribution Act (FICA) taxes. “Small employers” consist basically of all those single unit firms with payroll below a specified cutoff. The cutoff varied by kind of business (see “The mail universe,” item 2 below, for treatment of businesses covered in this report) and was designed, in most cases, to limit the “nonmail” group to establishments which would account for not more than 20 percent of total receipts in each kind of business. The “number-of-employee” equivalent of the payroll cutoff generally was in the range of one to three employees.

Data on receipts, payroll, and employment for “under cutoff” employer firms were obtained from the administrative records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA).

2. **The “mail” universe**—Information for firms in this group was obtained basically by means of a mail canvass. However, information on first quarter payroll and mid-March employment for single-unit employers (section b below) was obtained from IRS and SSA records. All employer firms for the kinds of business covered in this report were included in the “mail” universe on a 100 percent basis (without a payroll cutoff as described in item 1-b above). It is from firms in this group that specialized data, in addition to receipts, annual payroll, and employment were collected. Appendix B presents a facsimile of the report form used in the mail canvass. The “mail” universe includes the following categories:

a. **Firms in the census prec canvass**—The census prec canvass operation was basically designed to identify firms which operated units at more than one location.

Firms which were included in the prec canvass were drawn primarily from 1963 census records of multiunit firms and larger employers.

b. **Firms not in the census prec canvass**—Other firms included in the mail universe consist of employers other than those covered by section 1-b or 2-a above.

**Comparison of the 1963 Census With the 1967 Census**—Except for the method of coverage de-

scribed above, the 1963 and 1967 censuses were conducted under similar conditions and procedures. Strict comparability of the data for the two censuses is limited by the following factors:

1. **Classification**—For both 1963 and 1967, nonemployer firms were classified on the basis of information supplied on the Federal income tax returns. However, the 1967 classifications for nonemployer firms were coded in less detail than in 1963. Therefore, 1967 data for the combination of “employer” and “nonemployer” establishments are presented in less kind-of-business detail than was the case in 1963. Data for employer establishments, however, are shown in full detail.

For 1963, nonemployer firms were classified by IRS personnel with technical assistance of Census Bureau personnel. For 1967, classification of these firms was performed by personnel of the IRS through use of a coded listing of the kinds of business which were to be separately identified. While the technique of classification was substantially the same and was based on the firm’s description of its principal business activity, greater use was made in 1967 of “basket” classifications (e.g., miscellaneous business services).

The 1967 census classification for the small employer firms (see coverage of employers above) which were not mailed the census report forms was based on the following:

a. If the firms had been in business in 1963, the kind-of-business classification which had been assigned in that census was used.

b. If the firm was a “birth” since 1963, the SSA classification was used if it corresponded to a census classification.

c. If an adequate kind-of-business classification could not be assigned under the procedures outlined in “a” and “b” above, the firm was mailed a brief inquiry requesting information needed to assign such a classification.

d. If these three procedures proved inadequate, the firm’s description of its principal business activity as entered on its IRS business tax return was used.

To determine the Census classification for both 1963 and 1967 for establishments in the “mail” universe (section 2 under “Method of Coverage” above), considerable use was made of “self-designation.” For many kinds of business which posed classification problems, special questions were included to assist in assignment of the census classification. (For method

of classification of industries covered in this report, see the “Kind of Business Classifications” section below.)

2. **Active proprietors**—In the 1963 census, the number of active proprietors of unincorporated businesses was computed by crediting sole proprietorships with one proprietor and partnerships with two proprietors for each establishment in business during the week of November 15. In this report, the count of active proprietors is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for the following types of firms, including multi-unit firms:

a. All firms in business the full year.

b. All payroll firms in business during the pay period including March 12, 1967.

c. Every second nonpayroll firm not in business the full year.

3. **Coverage of nonemployers**—Although a comparison of data for nonemployer firms from the 1963 and 1967 censuses seems to indicate that there was an increase in the number of such firms and that they accounted for approximately as large a proportion of total service receipts volume in 1967 as in 1963, these conclusions are subject to the following limitations:

The combination of (1) the census processing cutoff occurring before the completion of the flow of tax forms from which the census nonemployer data were derived and (2) other processing omissions is estimated to have led to a loss of about 50,000 nonemployer firms accounting for about 1 percent of service receipts volume in 1963. This estimate, which is based on a study of a sample of tax forms made after the 1963 census results were compiled, reflects a more substantial census omission than previously had been estimated. Because of a later processing date for the 1967 census, omissions from this census are believed negligible. Both censuses probably omitted a small number of nonemployers (accounting for a negligible receipts volume) because the tax form kind-of-business description was inadequate to indicate they conducted an in-scope kind of business.

As noted in section 1-a under “Method of Coverage” above, only those service nonemployer establishments were included in the census which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. While these are the same rules used in the 1963 census, a

modification to reflect price changes probably would have resulted in the exclusion of several thousand additional marginal firms.

4. **Payroll**—In 1963 the inclusion in “payroll” of gratuities received by employees from patrons was not requested. In 1967, both in the case of payroll reported to the Internal Revenue Service and of payroll reported to the Census Bureau, businesses were requested to include in payroll the amount of tips and gratuities which were reported to employers as received by employees from patrons.

## EXPLANATION OF TERMS

**Establishments**—An establishment is a single physical location at which business is conducted. An establishment is not necessarily identical with the “company” or “enterprise” which may consist of one or more establishments. Census of business figures represent a summary of reports for individual establishments rather than for companies. For businesses which were mailed a census form, separate information was obtained for each location where business was conducted, including each location of multi-unit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in cases where distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification (SIC) Manual<sup>1</sup> for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

Leased service departments (separately owned businesses operated as departments of another service establishment or of a retail establishment, such as a separately owned shoeshine parlor in a barber shop or a beauty salon in a department store) are treated as separate service establishments in the selected services portion of the 1967 census.

---

<sup>1</sup> Executive Office of the President, Bureau of the Budget, **Standard Industrial Classification Manual, 1967.**

**Receipts**—Receipts include the total of all receipts from customers for services rendered and merchandise sold during 1967 whether or not payment was received during 1967. Total receipts exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the establishment directly from customers and paid directly by the establishment to a local, State, or Federal tax agency. Gasoline, liquor, tobacco, and other excise taxes paid by the manufacturer or wholesaler and passed along to the service establishment are also included.

Receipts do not include service receipts of manufacturers, wholesalers, retail establishments, and other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sales of merchandise to individuals or to other businesses) by establishments primarily engaged in performing services.

Although the count of establishments in this report represents the number in business at the end of the year, the receipts figures include receipts of all establishments in business at any time during the year. Nonemployer establishments are included in the tables if they operated at an annual receipts volume rate of \$1,000 or more; however, their reported receipts have not been projected to a full year's operation.

**Payroll entire year**—Payroll includes all forms of compensation such as salaries, wages, commissions, bonuses, vacation allowances, sick leave pay, and the value of payments in kind (such as free meals and lodging) paid during the year to all employees. Tips and gratuities received by employees from patrons which are reported to employers are included. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include compensation of proprietors or of partners. Payroll is reported before deductions for social security, income tax, insurance dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service for purposes of reporting on Form 941.

**Paid employees for the payperiod including March 12, 1967**—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll in the pay period including March 12, 1967. Included are employees on paid sick leave, paid holidays, and paid vacations. Proprietors and partners of unincorporated

businesses are not included. The definition of paid employees is the same as used in reporting on IRS Form 941.

#### Active proprietors of unincorporated businesses

—The number of active proprietors shown in this report is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for the following types of firms:

1. All firms in business the full year.
2. All payroll firms in business during the pay period including March 12, 1967.
3. Every second nonpayroll firm not in business the full year.

For multiunit proprietorships and partnerships, proprietors were credited to only one establishment of such multiunits.

#### Standard metropolitan statistical areas—

The standard metropolitan statistical areas (SMSA's) for which data are shown are those defined by the Bureau of the Budget.<sup>2</sup> A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more, or "twin cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities rather than counties are the units used in defining an SMSA.

**Guest rooms (hotels)**—Guest rooms represent the number of separate hotel rental units (transient or residential). In the 1967 census, suites of rooms which could not be subdivided were counted as single rooms or units. In the 1963 census, suites of rooms were not counted as units, but as individual rooms (e.g., a three-room suite was counted as three rooms). The number of guest rooms was tabulated only for hotels in operation at the end of the year.

Transient guest rooms consist of the number of units usually available for the occupancy of persons staying less than one month.

Residential guest rooms consist of the number of units usually available for the occupancy of persons staying a month or longer.

<sup>2</sup> Executive Office of the President, Bureau of the Budget, **Standard Metropolitan Statistical Areas, 1967**, as amended January 15, 1968.

**Rental units (motels, motor hotels, and tourist courts)**—Rental units consist of rooms, apartments, cabin units, and other types of lodging accommodations normally rented as a single unit. This definition is the same as used in the 1963 census. The number of rental units was tabulated only for establishments in operation at the end of the year.

**Percentage of occupancy**—This was computed by the respondent in accordance with the following instructions:

1. Multiply the number of guest rooms in your hotel by 365. (If you operated less than a full year, use the number of days you actually operated instead of 365.)
2. Determine the number of rooms which were occupied each day that you operated. Total these figures for all days operated.
3. Your percentage of occupancy is the number you get in "2" divided by the number you get in "1."

If records are not available as a basis for computing percentage of occupancy, your best estimate will be acceptable.

#### Weighted average percentage of occupancy—

This item is derived by computing daily average number of guest rooms occupied during the year (total guest rooms for each hotel multiplied by its percentage of occupancy) and dividing the sum of the averages by the total number of guest rooms in the group under consideration.

Example:

Establishment in the area	Number of guest rooms reported	Annual per- centage of occupancy reported	Average Number of rooms occupied during the year (col. 1 x col. 2)
	(col. 1)	(col. 2)	
Hotel A . . . . .	250	80	200
Hotel B. . . . .	200	70	140
Hotel C . . . . .	170	60	102
Hotel D . . . . .	120	90	108
	—	—	—
	740		550

The weighted average percentage of occupancy for this group of hotels is 76 (550 divided by 740).

Establishments in business less than a full year are fractionally weighted in this computation (e.g., if hotel B had been in operation for

only 6 months of 1967, the value in [col. 1] would have been reduced to "100," the value in [col. 1 x col. 2] to "70").

**Franchise or co-ownership group**—These are groups of motels and motor hotels which indicated membership in a franchise or co-ownership group carrying a common name. Establishments in such groups include those operated by the franchiser and those under joint ownership with a "co-ownership" group sponsor as well as those operated by independently owned franchisees. It does not include those which are only members of nonfranchise referral organizations.

**Period started**—This is the period in which the establishment commenced operation as a hotel or motel. It is not necessarily the period in which the owner or operator took over operation of the establishment.

## KIND-OF-BUSINESS CLASSIFICATIONS

"Services," as defined in the 1967 edition of the SIC Manual, includes establishments rendering a wide variety of services to individuals and business establishments.

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1967 edition of the SIC Manual. However, because in some instances a more detailed classification is required for census purposes than is available in the SIC Manual, additional kinds of business have been identified within the SIC categories. The basis for kind-of-business classification is described above in the sections under "Method of Coverage" and "Comparison of the 1963 Census With the 1967 Census—Classifications."

This report covers data for the SIC Group 701. Descriptions of those kinds of business

for which data are provided in this report follow:

Establishments engaged in providing lodging or lodging and meals to the general public except (1) rooming and boarding houses, (2) hotels which provide accommodations only for "permanent" residents, and (3) tourist homes. Apartment or residential hotels which provide accommodations for transients are included.

**Hotels, motels (SIC 7011)**—Formerly there were separate classifications for (1) year round hotels, (2) seasonal hotels, and (3) tourist courts and motels. In recent years, however, there have been significant changes in the characteristics of the establishments in this area and it has become increasingly difficult to arrive at mutually exclusive definitions for hotels and motels which would be satisfactory to all concerned. Effective with the 1963 Supplement to 1957 Edition, of the Standard Industrial Classification Manual, these classifications have all been combined under one category, "Hotels, tourist courts, and motels." In this report, however, they are presented in separate categories, as follows:

Year-round hotels, with 25 or more guest rooms.

Year-round hotels, with less than 25 guest rooms.

Seasonal hotels.

Motels, tourist courts.

Motor hotels.

The classification of individual establishments into "hotels," "motor hotels," and "motels, tourist courts" was based on the respondent's self-designation. A "seasonal hotel" classification was assigned to a hotel, regardless of number of rooms or size, if it was open less than 10 months of the year.
